Advance Electrical are delighted to introduce the new AEM-300 stand up multi-position powered chair. This top of the range, high quality product provides multi-functions such as stand up position, recline, flat recline, elevation and all position in between. Total comfort is achieved with the new reduced shearing force seating which provides good protection for people with weak skin or related conditions. With its 25 mile range it handles with minimum effort as it easily maneuvers in the stand-up position as well as other positions. Gary Taaffe is the owner and general manager of Advance Electrical Mobility and with the aid of his committed and reliable team has stated "Our purpose is to facilitate people who have mobility difficulties to easily regain their freedom and independence. Advantages from standing can help generally with body and mind Independence & freedom, at home, in your locality or in the workplace, may improve job prospects in some circumstances. Pressure relief
